FOR IMMEDIATE RELEASE

ADAM GIULIANO JOINS FIRM AS PARTNER

Kaplan Kirsch & Rockwell LLP will open a New York City office

DENVER, CO – January 17, 2017 – [Kaplan Kirsch & Rockwell LLP](#) today announced that [Adam Giuliano](#) has joined the Firm as a partner. This addition will complement Kaplan Kirsch & Rockwell’s ability to provide exceptional legal advice on the delivery of major infrastructure projects, in particular—but not exclusively—public-private partnerships (P3s). The Firm’s practices involve advising on the development and operation of some of the largest and most sophisticated transportation and other infrastructure projects around the country, including airports, highways, urban transit systems, public facilities, energy generation, and urban development.

With the addition of Adam, the Firm will open a [New York City office](#) to assist in representation of clients nationwide. Adam has experience representing clients regarding major infrastructure projects and related matters—including in the highway, rail, airport, water, and energy sectors—in which the Firm has also long represented public and private clients.

Adam earned his J.D. from New York University School of Law in 2005 and his B.A. from Yale University in 1999. Prior to law school, he worked for a nonprofit foundation focused on community and urban development initiatives in Newark. He is admitted to practice in New York and New Jersey. Adam was recognized as a “Rising Star” by the *New York Law Journal* in 2014 and has been ranked for project finance by *The Legal 500* for the past three years. Adam is active on the steering committee for the U.S. Infrastructure Law Forum. Prior to joining Kaplan Kirsch & Rockwell, Adam practiced for over a decade at a large international law firm.

Adam’s practice emphasizes structuring and procurement of P3s involving the design, construction, financing, operations and/or maintenance of transportation, and other infrastructure facilities. He has experience advising on greenfield projects, concessions of existing facilities, project company acquisitions and investments, and project financings. He has been involved in P3 projects for highways and commuter rail projects in Colorado, in addition to highway, bridge, rail (including high-speed rail), parking, port, airport, water and wastewater, telecommunications, and energy-related projects across the United States, including California, Texas, Florida, Virginia, New York, New Jersey, Illinois, and Indiana, as well as elsewhere around the world.

About Kaplan Kirsch & Rockwell

Founded in 2003, Kaplan Kirsch & Rockwell is a national law firm devoted exclusively to solving problems involving environmental, law use, public and private lands, infrastructure, and transportation law. The Firm represents local governments, individuals, corporate clients, and organizations in complex and controversial projects. These projects are often subject to intense public scrutiny and involve the intersection of private and governmental interests. The Firm has a reputation for crafting innovative solutions to high-risk and seemingly intractable problems involving the interplay of various disciplines of law. Kaplan Kirsch & Rockwell’s mission is to make the law an asset, not a hindrance, when achieving clients’ objectives. The breadth of the Firm’s practice includes active representations in more than half the states at any one time. The Firm has offices in New York, Washington, DC, and Denver, Colorado.
